### **DETAILED ACTION**

1. Claims 1 – 7, 9, 10 and 12 – 19 are pending in the application.

#### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 13, 2006 has been entered.

### **REASONS FOR ALLOWANCE**

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not expressly teach or render obvious the invention as recited in independent claims 1, 7, 9, 10, 12 and 16.

The prior art discloses a job processing system [col. 2, lines 35 – 39 of Motegi] comprising job issuing unit adapted to transfer to said output device job data including print data and attribute information which is used to start outputting the print data [col. 3, lines 38 – 57 of Motegi], a unit adapted to send attribute information notified to the second information processor by the first information processor to said output device [col. 3, lines 28 – 39 of Motegi], and a storage unit adapted to store received job data which includes print data and attribute information [col. 3, lines 15 – 19 of Motegi], a

control unit adapted to output print data stored in said storage unit if the attribute information send to said output device by said sending unit of the second information processor corresponds to the attribute information stored in said storage unit [col. 4, lines 1 – 22 of Motegi], a second information processor designating execution designation information including the attribute information to the output device [col. 9, lines 1 – 19 of Taniguchi], and identification information for identifying the output device to which the job data has been transferred [col. 4, lines 30 – 46 of Wiegley]. However, the prior art does not disclose a second information processor sending attribute information notified to the second information processor by the first information processor to the output device identified by the notified identification information in response to a user's instruction without the user entering the attribute information and identification information. The prior art requires a user to enter attribute and identification information to the output device [col. 2, lines 56 – 57 of Motegi, col. 7, lines 20 – 23 of Taniguchi].

In addition, the prior art of record does not provide a basis of evidence for asserting a motivation that one of ordinary skill level in the art at the time the invention was made would have integrated or modified the job processing system to incorporate the features a second information processor sending attribute information notified to the second information processor by the first information processor to the output device identified by the notified identification information in response to a user's instruction without the user entering the attribute information and identification information as recited in the context of independent claims 1, 3, 15, 17 and 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
